10:30 - 2:00 pm	<i>Hike North Inlet Trail to Cascade Falls (sign-up ahead of time)</i> <i>(optional add-on, may or may not happen)</i>

Civil twilight is defined to begin in the morning, and to end in the evening when the center of the Sun is geometrically 6 degrees below the horizon. This is the limit at which twilight illumination is sufficient, under good weather conditions, for terrestrial objects to be clearly distinguished; at the beginning of morning civil twilight, or end of evening civil twilight, the horizon is clearly defined and the brightest stars are visible under good atmospheric conditions in the absence of moonlight or other illumination. In the morning before the beginning of civil twilight and in the evening after the end of civil twilight, artificial illumination is normally required to carry on ordinary outdoor activities. Complete darkness, however, ends sometime prior to the beginning of morning civil twilight and begins sometime after the end of evening civil twilight.

Nautical twilight is defined to begin in the morning, and to end in the evening, when the center of the sun is geometrically 12 degrees below the horizon. At the beginning or end of nautical twilight, under good atmospheric conditions and in the absence of other illumination, general outlines of ground objects may be distinguishable, but detailed outdoor operations are not possible, and the horizon is indistinct.

THE TEN RETREAT AT SHADOWCLIFF

SESSION DESCRIPTIONS

“Twenty↔Twenty↔Twenty”

You may come for some or all or leave early ... very flexible.

Note: You will be having breakfast after this session.

➤ **Plyometrics Exercise (20 minutes: 7:00-7:20am)**

Christopher and Amirta (Friday & Saturday; not on Sunday)

Plyometrics, also known as "jump training" or "plyos", are exercises in which muscles exert maximum force in short intervals of time, with the goal of increasing both speed and power. This training focuses on learning to move from a muscle extension to a contraction in a rapid or "explosive" manner, such as in specialized repeated jumping.

➤ **Yoga (20 minutes: 7:20-7:40am)**

Christopher and Amirta (Friday & Saturday; Sunday after closing)

Yoga may involve putting one's body in what initially seems like unusual poses or *asanas*. This results in gently exercising muscles and joints so we can go through the day without body pains, and we can sit and quiet our minds. Yoga can be especially effective for countering side effects of meds and helping our internal organs boost our immune systems. This mild yoga session should just make your body feel good and let you be mellow. Join us! Namasté.

➤ **Qigong (20 minutes: 7:40-8:00am) followed by brief meditation**

Christopher and Amirta (Friday & Saturday; Sunday after closing)

Qigong and *T'ai Ji* are ancient Chinese healing movement arts that bring peace to the mind and healing to the body. Working with gentle movement, focus, and the breath, these exercises help increase the energy level in the body, create a sense of grounded awareness, and improve circulation, balance, coordination and muscle tone, as well as helping to clear the mind and bring about a state of peace. They are gentle exercises, making them appropriate for anyone, regardless of their physical abilities. Qigong is an excellent way to experience power and dominion within through finding center. This session will focus on bringing to each of us the awareness of the power of Chi, with specific methods to help increase the feeling of energy and vitality in the body.

Living Well with HIV ... Not Just Longer

Lark Lands (Friday 1:15 pm)

Protecting the body from damage and eliminating or improving life-degrading symptoms related to HIV disease and the drugs used to treat it are absolutely possible! Lark will present information on the key components of an HIV wellness approach to eliminating drug side effects and other symptoms, preventing body damage, and slowing disease progression with nutrients, hormonal treatments, dietary practices, and exercise, combined with the best available pharmaceutical therapies.

Lark Lands is an internationally respected treatment expert, a contributing medical editor and writer for the American Academy of HIV Medicine, the Hepatitis C Caring Ambassadors Program, The Positive Side, CATIE's Practical Guides, the www.AIDSmeds.com website, and the Houston Buyers Club. Lark is a long-time treatment activist, journalist, and educator. She is the author of the Symptoms, Side Effects, and Serious Complications Series, e-booklets with comprehensive information on treatment approaches to common problems (available at www.larklands.net).

A frequent speaker at international, national, state, and local AIDS conferences, she is currently presenting a new seminar called "Living Well...Not Just Longer!" to groups throughout America.

Creative Visualization (Dream Boards)

Tom Japhet (Friday 3:00 pm)

Using an exercise from the bestseller "Creative Visualization" by Shakti Gawain, we will create "vision boards" which is an actual picture of your desired goal or reality for the next year. A "vision board" is valuable because it forms an image which can then attract and focus energy into your goal. The board will be a drawing or sketch or collage using pictures and words cut from magazines. Don't worry if you aren't artistic. Simple vision boards are just as effective as great works of art. We will also explore how to use the board you've created over the course of the next year. (All sorts of supplies will be available for you to use.)

TEN Topics in HIV

Tom Campbell, MD, University of Colorado (Saturday 10:30 am)

This seminar will review ten topics/questions in HIV care, prevention, and research, with an emphasis on recent developments, including the recent CROI conference in Boston. The topics will include new drugs and combos, new methods for HIV prevention, side effects of therapy, and optimizing HIV primary care. There will be plenty of opportunity for Q & A.

Nutrition Workshop: 4 Steps to Smarter Eating

Debbie O'Reilly (Saturday 1:00 pm)

Develop your nutrition profile, discover the 2 ingredients in many foods that are harmful to your health and how to spot them by reading nutrition labels. Then develop a personal food plan to save you money and add years to your life.

Listening Session on HIV Care Services

Jean Finn, HIV Resources Planning Council (Saturday 3:00 pm)

When Congress passed the Ryan White Care Act in the early 90's, it required community involvement to determine which services meet the needs of people living with HIV and to allocate funds accordingly. Come and give your input on how you think funds should be spent in the 6 county Denver metropolitan area. Participants will share their experiences and ideas on how to improve health service and stay healthy in their community. Incentives will be provided.
